To whom it may concern:

I am writing this letter as a reference for Caribou Construction.

Caribou construction recently built for us a 138 KV to 34.5 KV Substation in Riddle, Idaho. The site is quite remote with layers of solid rock. I was quite concerned about the project from the beginning due to its location.

I knew within days of awarding the contract to Caribou we had made the right choice. Within one week, equipment was on the job for site prep and things actually moved much quicker than I had anticipated.

The project was done in a very timely manner. The entire construction process went extremely smooth from start to finish.

I very much enjoyed working with the staff and would highly recommend the work of Caribou Construction to anyone in the future.

Sincerley,

Chad Black
